ETONIEN's Financial Transformation Practice delivers project and interim CFO services tailored to the unique needs of private equity portfolio companies across the full M&A lifecycle—diligence, execution, closing, and post-close. With rapid access to a diverse bench of seasoned operators and flexible engagement terms, our private equity-ready consultants expertly navigate the complexities of PE ownership to drive results and create value.

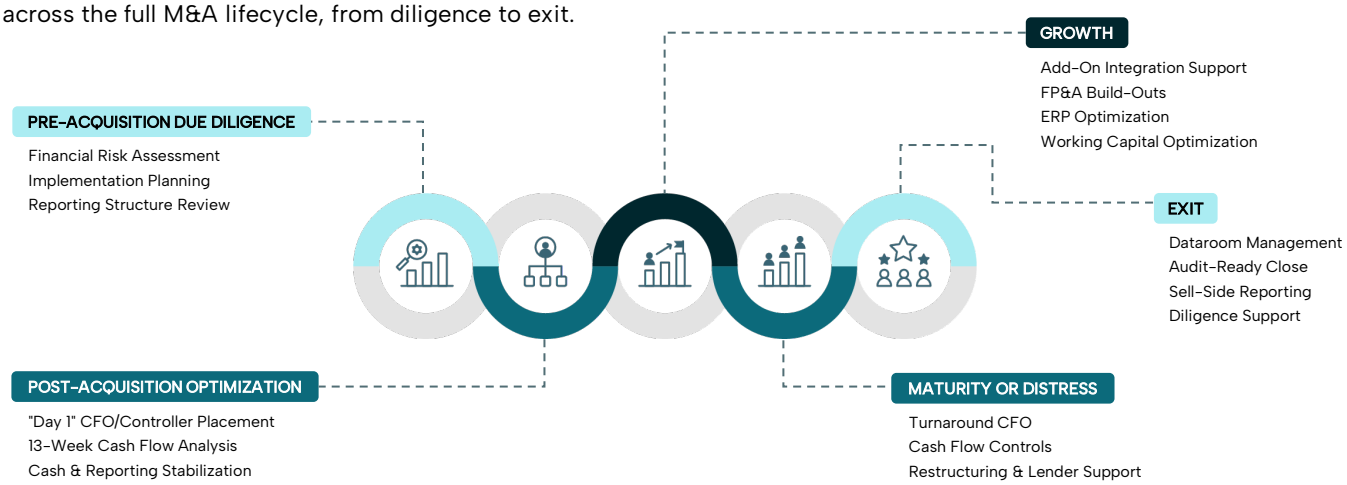

Private Equity Funds

ETONIEN delivers strategic financial and operational support to private equity firms across the investment lifecycle. From managing carve-outs and due diligence to planning exits, we mitigate risks, maximize opportunities, and drive value creation. When challenges arise, our crisis management and interim leadership ensure stability and success in high-pressure situations.

PE Portfolio Companies

ETONIEN provides hands-on support to portfolio companies, driving operational excellence and scalability. From carve-out execution to post-acquisition integration, we actively align operations with strategic goals. In critical moments, our crisis management expertise ensures stability and positions companies for long-term success.

Delivering interim and project-based finance and accounting operators across the full M&A lifecycle, from diligence to exit.

Post-Close Transformation

- "Day 1" operator to lead financial transformation
- Opening balance sheets, purchase price allocations and working capital true-ups
- Establishment of 13-week cash flow analysis and financial reporting packages
- Assessment and implementation of ERP/CRM/EMR
- Alignment of KPI's with PE performance metrics

Carve-Out Management

- Pre-close/post-close carve-out specialist
- Establishment of financial function (policies & procedures, ERP)
- Historic standalone analysis
- TSA negotiation and management
- Build & train standalone finance team to take full responsibility post-TSA

Value Creation & Performance Improvement

- Streamline core processes (order-to-cash, procure-to-pay)
- Enhance transparency and accuracy of financial reporting
- Improve forecasting accuracy for better decision-making
- Ensure financial and operational readiness for exits

M&A Due-Diligence Support

- QoE, cash flow, EBITDA normalization, and working capital analysis
- Revenue recognition testing
- Assess performance and validate projections
- ERP review and analysis
