

Corporate Services

Accounting and Financial Reporting

ETONIEN provides on-demand individual and team-based accounting and finance consultants to clients seeking technical and operational assistance. Our consultants serve an extensive range of companies from start-ups first establishing their financial records, to private and public companies looking to enhance their accounting and financial reporting.

Extensive operational and deep technical accounting experience means seamlessly assisting departments with projects ranging from busy seasonal demands for quarterly and annual financial report preparation to unique projects requiring highly specialized skills. Additionally, our accounting and financial reporting services are used to facilitate the transition of private equity portfolio companies, as well as assisting companies with IPO documentation and related regulatory filings.

Specific solution areas:

- **Financial statement preparation and consolidation**
- **Financial and SEC reporting including 10K's and 10Q's**
- **GAAP and ASC pronouncements – implementation of new accounting standards**
- **IFRS implementation**
- **Complex revenue recognition and restatement projects**
- **Process re-engineering, optimization and simplification**
